DETAILED ACTION

Response to Amendment

1. In view of applicant's amendment filed 19 September 2005, rejections under 35 U.S.C. § 112, are withdrawn.

Allowable Subject Matter

2. Claims 1-3, 5, 6, 9, 10, 12-14 and 16-18 allowed over the Prior Art of record.
3. The following is an examiner's statement of reasons for allowance: The primary reasons for allowance of independent claims 1, 2 and 12 is the inclusions of a device for non-contacting measurement of a length of a non-abraded length of a sliding contact brush wherein amplitudes of fluctuations/pulses of pressure are determined between maximum and minimum air pressures. As to independent claim 3, the employment of a pneumatic sensor connected via levers and rod linkages to the brush are employed. As to independent claim 13, the provision of a mechanism for adjusting the entire height of a brush block including a plurality of brushes according to the signals of pneumatic sensors. As to claim 17, the employment of a difference (i.e. differential pressure measurement between a maximum and minimum air pressure being evaluated is the primary reason for allowance of the claim. The closest reasonable Prior Art references is DE 196 19 728 to Klarr, which discloses an apparatus/method for determining the brush lengths via air pressure, however, does not teach the specific limitations of the allowed independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
